

# CHANCE RIDES®

## Manufacturing Excellence

### Engineering

Our experienced designers and engineers use their imagination, creativity, skills and tools to translate an idea into reality.

### Prototype Shop

Every concept gets proven out with a working prototype that undergoes rigorous testing and establishes manufacturing specifications.

### Fabrication

Chance Rides has been at the forefront of manufacturing excellence for over 50 years and we remain a leader in the industry. Our rides are American made using American ingenuity.

## Molding

Our full integration includes molded parts on our rides, coasters and people movers. Including carousel scenery and animals.

## Painting

Chance Rides uses meticulous quality standards to ensure a long lasting paint finish on every part of our rides. Each section of the part is measured for paint thickness to ensure a consistent coating. Parts go through several steps to make sure that they start out perfectly clean prior to the paint being applied. All of this is done to ensure that the customer and their guests enjoy a quality product for many years.

## Carousel Art

From our own assortment of classic carousel horses and wildlife animals to custom designs, every carousel animal is painstakingly detailed by hand, requiring up to 100 man hours per figure. And no two figures are ever completed alike.

## Final Assembly

The Chance Rides' 40 acre facility is fully integrated, giving us the ability to complete assembly to the customers exact specifications.

## Chance Rides Custom Care

From delivery, to installation, to when the ride is in service, Chance Rides remains your partner with personalized customer support for every aspect of your operation.
