Refurbished Rides...

Save Capital Dollars

Refurbishing existing rides extends capital dollars.

Reduce Operating Expenses

Less maintenance expenses, downtime and legal exposure means lower costs.

Re-theme Old Rides

A new theme adds "freshness" to your park.

Our Work Is Factory Certified And Warranted

All refurbishment work is performed by factory certified technicians and comes with a 12 month limited warranty.

...Pay Big Dividends!

Improved Guest Satisfaction

Bright, new and clean rides will thrill your guests.

More Repeat Business

When guests have a great time, they tell their friends – and return again and again.

Longer Stays

Happy customers stay longer – and spend more money on food, gifts, games, and other attractions.

Improved Employee Pride and Morale

Employee attitudes dramatically affect guest satisfaction. Employees that are proud of their rides work harder to serve their guests better.

Improved Profitability

More attractive rides, increased employee morale, higher guest satisfaction, more repeat business – refurbished rides mean more profits for you.

INTRODUCING OUR RIDES REFURBISH

All Work Fac

Here's How It Works

When your ride is refurbished, we strip it to bare steel and complete updated electrical systems, mechanical systems and it will h

5. Steel Parts Sandblasted

After disassembly, steel
parts are sent to our in-
house facility where they
are sandblasted and
inspected.

2. Scope Of Work Established

We will evaluate the ride,
agree on the scope of work
for the factory services and
then create a timeline for
the work to be completed.

6. Primed And Repainted

Following the sandblasting,
steel parts are primed and
repainted with Sikkens
Acrylic Urethane Paint at our
state-of-the-art paint facility.

3. Ride Disassembly

We will work with you to
schedule the disassembly
and shipment of your ride
back to the factory. Chance
resources are available for
supervision, trucking or
turnkey ride removal.

7. Fiberglass And Plastic Parts Repaired

Fiberglass and plastic parts
are repaired or replaced
and repainted for a shiny
new appearance.

4. Refurbishment Begins

Upon arrival at the factory,
workers further disassemble
the ride. The components
enter the refurbishment
process.

8. Electronic Control Systems Updated

Next, electronic control
systems are evaluated and
updated with new
components that meet
current electrical standards.

OUR NEW TURNKEY REBUILD PROGRAM

Factory Certified

completely rebuild it from there. Your finished ride will be returned to you with the appearance of a brand new ride.

9. New Wiring And Lighting

Once electronic systems are evaluated and updated, new wiring and lighting packages are added. Custom theming and special lighting (LED) are available.

10. Final Reassembly And Testing

Now, the refurbished components are ready for reassembly. All major systems are inspected at the factory before shipment.

11. Shipped Back To You

After final testing, your ride is loaded and shipped back to your site on our custom-built delivery trailers.

12. Ride Reinstalled At Your Site

Finally, your ride is reinstalled at your site with Chance supervision and/or Chance turnkey installation.

Chance Service Beyond

CRM leads the industry in customer support by offering the following convenient services:

- 24-hour emergency service
- Superior customer training
- Multimillion-dollar spare parts inventory maintained in stock
- User-friendly manuals
- Credit card payments accepted
